SUSTAINABILITY. SOSTENIBILITÀ.

EN WOOD

Respect for nature and its materials: At ILCAM group, we are proud of the environmental role we play in the furniture supply chain. For us, setting high environmental standards comes naturally.

-We use wood and wood-based panel products certified by the Program for the Endorsement of Forest Certification schemes (PEFC) or Forest Stewardship Council®(FSC®). These products use timber from verified well managed forests, which ensures a renewable and sustainable resource.

-Particle board: we have chosen to utilize particle board made from wood particles 100% recycled of various sizes pressed with resins with a low formaldehyde content. A product with a low environmental impact, recycled and recyclable.

-CARB panels are also always available, in order to answer and to anticipate market requests to minimize emission. Studies show that panels class E1 have an emission less than 0.1 ppm. A Carb certified panels, measured under the same conditions, have a lower emission of about 0.065 ppm

IT LEGNO

Rispetto per la natura e i suoi materiali: alla ILCAM group siamo orgogliosi del ruolo ambientale che svolgiamo nella catena di fornitura per l'arredamento. Per noi, stabilire standard ambientali elevati viene naturale.

- Usiamo prodotti in legno e pannelli a base di legno certificati dal Programma di Valutazione degli schemi di certificazione forestale (PEFC) o Forest Stewardship Council® (FSC®). Questi prodotti utilizzano legno proveniente da foreste controllate e verificate, che garantiscono una risorsa rinnovabile e sostenibile.

-Pannelli in truciolare: abbiamo scelto di utilizzare pannelli truciolari realizzati con particelle di legno riciclate al 100% di varie dimensioni pressate con resine a basso contenuto di formaldeide. Un prodotto a basso impatto ambientale, riciclato e riciclabile.

-I pannelli CARB sono sempre disponibili, al fine di rispondere e anticipare le richieste del mercato per ridurre al minimo le emissioni. Gli studi dimostrano che i pannelli di classe E1 hanno un'emissione inferiore a 0,1 ppm. I pannelli certificati Carb, misurati nelle stesse condizioni, hanno un'emissione inferiore di circa 0,065 ppm

EN PLASTIC

Turning the problem into an opportunity is the great challenge that ILCAM Group has collected and won, developing a production process that makes it possible to derive from the recycling of plastic bottles an 85% PET film finishing film.

The phases of the process are as follows:

- selection of bottles;
- elimination of metal impurities, labels, caps;
- crushing to obtain the granules in PET;
- extrusion of the granules in PET to obtain the finishing film;
- realization of the panel by lamination or thermoforming.

RECYCLING.

IT RICICLO

Trasformare il problema in opportunità è la grande sfida che ILCAM Group ha raccolto e vinto, mettendo a punto un processo produttivo che permette di ricavare dal riciclaggio delle bottiglie in plastica un film di finitura dei pannelli all'85% in PET.

Le fasi del processo sono le seguenti:

- selezione bottiglie;
- eliminazione impurità metalliche, etichette, tappi;
- schiacciamento per ottenere i granelli in PET;
- estrusione dei granelli in PET per ottenere il film di finitura;
- realizzazione del pannello mediante laminazione o termoformazione.

PLASTICA.

ILCAM was founded in 1959 and today is the world leading manufacturer of frontals for the furniture industry.

From its headquarters in Cormons, Friuli Venezia Giulia, ILCAM drives a network of **STRATEGIC BUSINESS UNITS**, coordinated according to a diversification strategy and an integrated manufacturing logic, providing the broadest and most complete offer of industry-leading technologies and processes.

A great effort has been made to integrate human and technological resources to reach the actual position, employing more than a thousand people.

The wide range of products, and large capacity of **more 70.000 pieces daily**, which can be sourced from ILCAM delivers a great deal of value to the customers.

Craftsmanship, automation, and sophisticated planning and control systems, streamline company's operations.

Endless innovation of product and process, and of organizational and managerial systems, along with high level of service, makes ILCAM a leading company in the industry.

ILCAM è stata fondata nel 1959 ed oggi è il principale produttore mondiale di frontali per l'industria del mobile.

Dalla sua sede di Cormons, in Friuli Venezia Giulia, ILCAM guida una rete di **STRATEGIC BUSINESS UNIT**, coordinate secondo una strategia di diversificazione e una logica di produzione integrata, offrendo la più ampia e completa offerta di tecnologie e processi del settore.

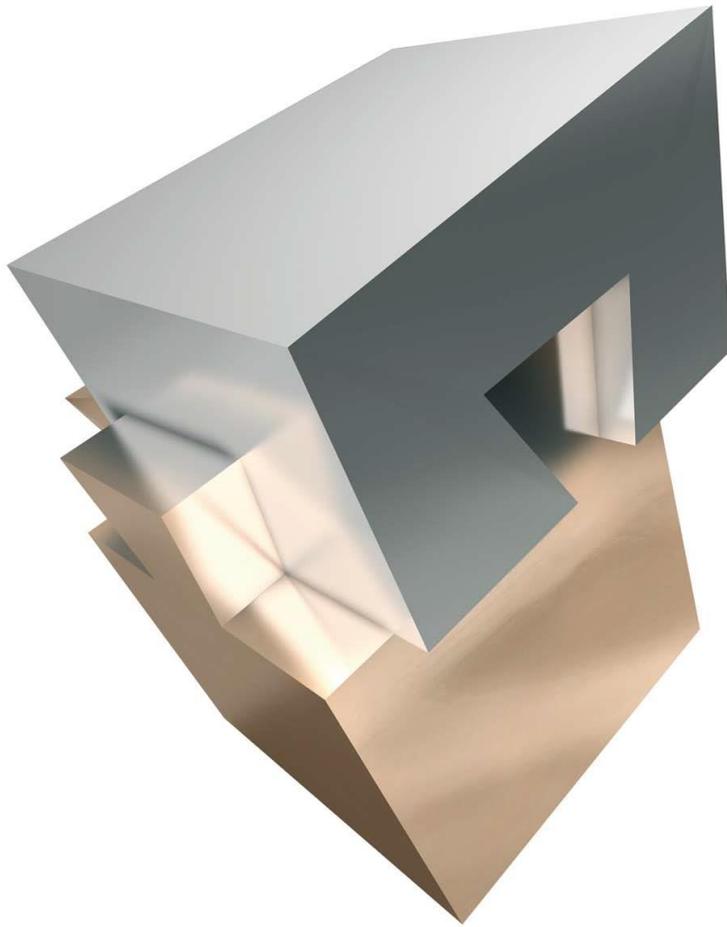

È stato fatto un grande sforzo per integrare le risorse umane e tecnologiche per raggiungere la posizione attuale, impiegando più di mille persone.

L'ampia gamma di prodotti e la grande capacità produttiva di **oltre 70.000 pezzi al giorno**, che possono essere forniti da ILCAM, offrono un grande valore ai clienti.

Artigianato, automazione e sofisticati sistemi di pianificazione e controllo, semplificano le operazioni dell'azienda.

L'innovazione senza fine del prodotto e del processo, dei sistemi organizzativi e gestionali e l'elevato livello di servizio fanno di ILCAM un'azienda leader del settore.
